

Letter of Recommendation

To whomsoever it concerns

I am pleased to write this letter in the strongest possible support of Mr. Shree Choudhari's application to your esteemed university's Master's program. I had the distinct opportunity of overseeing Shree's work as an intern at Tata Advanced Systems Limited (TASL). He joined us in June 2025, having secured the internship based on his impressive knowledge of automation and his keen interest in defence technology.

At Tata Advanced Systems Limited (TASL), Shree worked on a project that addressed an important skill gap in welding that was hampering production quality. Addressing the shortcomings of ineffective conventional training, Shree leveraged his strong mechatronics abilities to develop our multilingual Virtual reality (VR) welding training modules. He skilfully integrated industrial-grade sensors with actual welding equipment to create highly realistic and effective training simulations. This innovative approach significantly elevated the quality and safety of personnel training across TASL's Indian and Moroccan manufacturing facilities. Shree has a real talent for making complex industrial technology work. Drawing on his extensive knowledge of automation, he excelled at integrating and troubleshooting our systems to ensure the simulations were always stable and dependable. From system latency to user interface design, he showed a sharp analytical ability to identify particular areas for improvement. He would then work closely with our vendors' engineers to implement the required changes after giving them insightful, data-driven constructive feedback. His great communication skills helped bridge cultural and linguistic gaps, promoting seamless teamwork and understand each other better. For our operator training, the VR platform that resulted from Shree's exceptional effort was revolutionary. His work makes it possible for them to work through real-life welding jobs in a controlled environment which makes it safe and repeatable. After module completion, the system provides a robust performance analysis showing key measurements such as hand straightness, torch position, and travel speed as well as a simulated weld strength score. This immediate, data-driven feedback allows operators to objectively assess their performance, identify specific areas for improvement, and practice repeatedly to enhance their scores a process that directly correlates with an increase in their real-world proficiency. What personally impressed me most was Shree's innovative thinking in designing these critical metrics. His ability to distil a complex physical skill into a few key measurable parameters was fundamental in making the entire program effective. The project has not only equipped TASL with a more highly skilled workforce but has also significantly reduced our training costs by 35%. The project success is a clear testament to his outstanding analytical and troubleshooting abilities, which are strongly grounded in his profound expertise in Mechatronics.

Shree displayed excellent leadership by overseeing and training the TASL operator team on a VR welding training system. He expertly guided team members through immersive VR training thereby, building their confidence and proficiency in both the technology and real-world welding procedures. This made them more confident and encouraged them to work together. His proactive and encouraging approach highlights his strength in leading and uplifting team performance in a practical and outcome-focused way. Moreover, Shree also helped in developing an offline, real-time multilingual translator that became essential for smooth communication between India's TASL employees and foreign delegates. This practical solution not only demonstrated his strong problem-solving skills but also showed his ability to work effectively in a diverse, multinational environment.

Throughout his tenure, Shree has been characterized by analytical rigor, creativity, dedication, and a drive for continuous learning. He proved to be a highly capable and discerning individual, adept at navigating complex technical challenges to deliver effective solutions. I am confident he will bring these outstanding qualities to his Master's studies and will make significant contributions. I would therefore highly recommend Mr. Shree Choudhari and will be pleased if my recommendation helps him to get admitted to your esteemed university.

If I can be of any further assistance, or provide you with any further information, please do not hesitate to contact me.

Sincerely,

Mr. Sachin Mathew
